Introduction — Why **WhatsApp Business**

Part 1 — Set Up **WhatsApp Business**

1. Get the App (and Why It's Not Your Personal **WhatsApp**)
2. Set Up a Profile Customers Trust
3. Turn On Your Auto-Replies
4. Save Your Answers with Quick Replies
5. Build Your Catalog
6. Get Your Chat Link & QR Code
7. Organize Every Customer with Lists
8. Get Paid with Payment Links

Part 2 — Put It to Work

1. A Day with **WhatsApp Business**
2. Let AI Write Your Messages
3. Follow Up Like a Pro

Closing — Your First Week

Bonuses: Ready-to-Use Scripts · The Ultimate Checklist

Introduction — Why WhatsApp Business

"Your customers are already on WhatsApp. This book simply shows you how to turn it into your best employee."

This is a hands-on guide. There is very little theory here — just the exact steps to turn **WhatsApp Business** into the tool that greets your customers, answers their questions, keeps them organized, and helps you get paid.

You already know a business needs to answer fast and follow up. What almost nobody shows you is *how* to make that happen with the free app your customers already use every day. That's what you'll do here, one screen at a time.

Did you know?

Hispanic Americans are the largest **WhatsApp** user group in the United States — 56% use it actively, well above any other demographic. For many of your customers, **WhatsApp** isn't one option among many. It's the app they already trust for anything that matters. Meeting them there removes the biggest barrier to a sale before it even exists.

Keep your phone next to you as you read. By the end, your **WhatsApp Business** will be set up and working for you.

Chapter 1 — Get the App (and Why It's Not Your Personal WhatsApp)

DOWNLOAD, VERIFY, AND UNDERSTAND THE DIFFERENCE

WhatsApp Business is a separate, free app. This is the part almost nobody explains. It is *not* the same app you use to text your family. It's a different app — with a different icon — that you download for free from the App Store or Google Play. It gives you business tools (greeting messages, catalog, lists, quick replies) that regular **WhatsApp** simply doesn't have. You can use it with the same phone number you already have, and your customers won't notice any difference on their side — they just message you as usual.

CHAPTER 1

The three versions of WhatsApp

	Personal	Business Free · this book	API
Cost	Free	Free	Pay per use
Auto messages	✗	✓	✓
Catalog	✗	✓	✓
Quick replies / lists	✗	✓	✓
Advanced automation	✗	Basic	✓
System integration	✗	✗	✓

The free **Business** app gives a small business almost everything it needs. The API is for scaling later.

 Do It On Your Phone — Get WhatsApp Business (Free)

1. Open the **App Store** (iPhone) or **Google Play** (Android).
2. Search for "**WhatsApp Business**" and tap **Get / Install**. Look for the icon with the letter **B** inside the speech bubble — that's the business version.
3. Open it and **verify your phone number**. If you already use regular **WhatsApp** on this number, the app will offer to **move your chats over** — tap yes.
4. Fill in your **business name** and category. Done.

Note: you can keep your personal **WhatsApp** on a second number if you like, but most solo owners simply turn their existing number into their business number.

 **On your computer, too. WhatsApp Business** also has a **desktop app** (Windows/Mac) and a browser version at **web.whatsapp.com**. You'll set up most tools on your phone, but once they're ready you can reply from a full keyboard.

That's it — you now have the tool. The rest of Part 1 is about switching on each feature, one at a time.

Chapter 2 — Set Up a Profile Customers Trust

YOUR PROFILE IS YOUR DIGITAL STOREFRONT

Before a customer reads your first reply, they look at your profile. A complete, professional profile answers the silent question *"Can I trust this business?"* — so fill in every field.

Do It On Your Phone — Find Your Business Tools

Everything in this book lives in one place. Learn to get there once:

- **Android:** open **WhatsApp Business** → tap the : (three dots, top right) → **Business tools**.
- **iPhone:** open **WhatsApp Business** → tap **Settings** (bottom right) → **Business tools**.

To edit your name, photo, description, address, and website, tap your **business name** at the top of Settings → **Business profile**.

Business tools — where greetings, quick replies, lists and your catalog live.

Fill in each field the way a customer would want to see it:

- **Name:** your business name, clear and searchable (e.g. *Bright Smile Dental*), not a nickname.
- **Photo:** a clean logo, or a professional headshot if you're a solo provider. People buy from people.

- **Description:** what you do, who you help, and why choose you — in one or two lines.
- **Address, website, email, hours:** complete them all. Missing information makes customers suspicious.

Set honest business hours so customers know when to expect a reply — and so your Away Message (Chapter 3) can switch on automatically.

Do It On Your Phone — Set Your Business Hours

1. Go to your **Business profile** → tap **Business hours** (Android) / **Hours** (iPhone).
2. Choose **Open with hours**.
3. Tap each day to set opening and closing times. Turn off the days you're closed.
4. Tap **Save**.

Honest hours build trust — and power your away message.

Chapter 3 — Turn On Your Auto-Replies

GREET EVERY CUSTOMER, EVEN WHILE YOU SLEEP

Two settings make your business feel responsive around the clock: a **greeting message** for new chats and an **away message** for after hours. Set them once and they work forever.

The **greeting message** is your digital handshake. It welcomes every new customer before you ever touch your phone.

Do It On Your Phone — Turn On Your Greeting Message

1. Open **Business tools** → **Greeting message**.
2. Turn on **Send greeting message**.
3. Tap the text to edit it. Paste your welcome message.
4. Tap **Recipients** (default: **Everyone** who messages you for the first time).
5. Tap **Save**.

The greeting your customer receives automatically — day or night.

The away message keeps customers informed when you're closed — no guilt about not answering at midnight.

📱 Do It On Your Phone — Turn On Your Away Message

1. Open **Business tools** → **Away message**.
2. Turn on **Send away message**.
3. Paste your away message.
4. Tap **Schedule** → **Outside of business hours** (it uses the hours you set in Chapter 2 — the easiest option).
5. Tap **Recipients**, then **Save**.

Your away message keeps customers informed, even at 10 PM.

Keep both messages warm and human. Avoid robotic lines like *"Your inquiry has been received."* Sound like a real person who's glad to help.

Chapter 4 — Save Your Answers with Quick Replies

STOP TYPING THE SAME THING EVERY DAY

You answer the same questions constantly: your hours, your prices, your address, whether you take insurance. Save each answer once as a **Quick Reply**, then drop it into any chat by typing .

Do It On Your Phone — Create a Quick Reply

1. Open **Business tools** → **Quick replies**.
2. Tap **Add** (Android) / the **+** (iPhone).
3. In **Message**, type the full response (e.g. your hours or pricing).
4. In **Shortcut**, type a keyword like **hours** or **pricing** (no spaces).
5. Tap **Save**.

To use it: in any chat, type  followed by the shortcut (e.g. **/hours**), then pick it from the list.  **On your computer** it works the same way with the  key.

Type "/" and your saved answers appear instantly.

Start with five: **hours**, **pricing**, **address**, **booking**, and **insurance** (or whatever your customers ask most). Save two minutes per chat, thirty chats a day — that's an hour back, every day.

Chapter 5 — Build Your Catalog

A ONE-TAP SHOWROOM FOR YOUR SERVICES

Instead of describing your services over and over, build a **catalog** once and send it with a single tap. Think of it as a digital showroom that lives inside the chat.

Do It On Your Phone — Create Your Catalog

1. Open **Business tools** → **Catalog**.
2. Tap **Add item** (Android) / **Add new item** (iPhone).
3. Add one or more **photos** of the service or product.
4. Fill in **Name**, **Price** (or leave blank and add "Starting at..." in the description), and **Description**.
5. Optional: add a **Link** (your website/booking page).
6. Tap **Save**. Repeat for each service.

To send it: inside any chat, tap the **paperclip / +** → **Catalog** → choose items → **Send**.

Your catalog answers "what do you offer?" with one tap.

Give each item a specific name and a clean photo. *"New Patient Special — Exam, Cleaning & X-Rays"* sells far better than *"Cleaning."*

Chapter 6 — Get Your Chat Link & QR Code

MAKE IT EFFORTLESS TO START A CONVERSATION

Every extra step loses customers. **WhatsApp Business** gives you a **short link** and a **QR code** so anyone can start a chat in one tap — put them everywhere.

Do It On Your Phone — Get Your Link & QR Code

1. Open **Business tools** → **Short link**.
2. Copy your ready-to-share link (e.g. `wa.me/1210XXXXXXX`) for your website, ads, and social bios.
3. Tap **Edit default message** to pre-fill what customers see, e.g. *"Hi! I'd like more information about..."*.
4. Tap **QR code** → **Share** or **Save** to download it for print.

Put this QR on cards, invoices and your window — every scan starts a chat.

Put the QR code on business cards, invoices, your storefront window, your vehicle, and email signatures. Every scan starts a conversation.

Chapter 7 — Organize Every Customer with Lists

A SIMPLE CRM YOU ALREADY OWN

As chats pile up, they all start to look the same. **Lists** turn your inbox into an organized pipeline — you always know who's new, who's waiting, and who owes you money.

Do It On Your Phone — Create and Assign Lists

- **Create:** : / Settings → **Business tools** → **Lists** → **New list** → name it, pick a color → **Save**.
- **Assign:** press and **hold** a chat → tap the **list** icon → choose the list(s).
- **View one stage:** tap the **Lists** filter at the top of your chats and pick a list to see only those customers. Works on the desktop app too.

Every customer has a status — your inbox becomes a pipeline.

Start with a simple pipeline and give every conversation exactly one list:

CHAPTER 7

The customer pipeline, built from lists

Every conversation gets one list. Each morning you open **Follow-up needed** and **Payment pending** first — that is where the revenue hides.

Each morning, open **Follow-up needed** and **Payment pending** first. That's where tomorrow's revenue is hiding.

Chapter 8 — Get Paid with Payment Links

COLLECT WITHOUT THE AWKWARD CONVERSATION

Most late payments aren't intentional — customers simply forget. Make paying effortless by dropping a **payment link** right into the chat, and save it as a Quick Reply so it's one tap away.

Do It On Your Phone — Keep Your Payment Link Handy

1. Set up a payment link with your provider (Stripe, Square, PayPal, etc.).
2. Save it as a **Quick Reply: Business tools** → **Quick replies** → **Add** → paste your link → shortcut **pay** → **Save**.
3. In any chat, type **/pay** and send. The link drops right in — no searching.

One tap to pay — money arrives without an awkward conversation.

Use the same simple flow with every customer so cash flow becomes predictable:

CHAPTER 8

One payment system, every time

When every customer moves through the same steps, cash flow becomes predictable and late payments shrink.

Always confirm when a payment arrives (*"Thank you! We've received your payment."*) — it takes five seconds and builds trust.

Chapter 9 — A Day with WhatsApp Business

WHAT IT LOOKS LIKE IN REAL BUSINESSES

Here's how the pieces you just set up work together in everyday situations. Adapt the messages to your own business.

A dental office. A new patient messages after hours. Your **away message** replies instantly with your hours and emergency number. In the morning you send `/insurance` and your **catalog** item for the new-patient special. You add them to your **New Lead** list, then move them to **Appointment Confirmed** once they book. After the visit, you send `/pay`, then a thank-you and a review request.

A roofing contractor. A homeowner scans the **QR code** on your truck and messages *"Can you look at a leak?"* Your **greeting** welcomes them and asks for their address and a photo. You send an estimate, add them to your **Quote Sent** list, and follow up in two days. When they approve, you collect a deposit with `/pay`.

A salon or med spa. A client asks *"How much is a facial?"* You reply with `/pricing` and your **catalog**. You book them, send a reminder the day before, and after the visit invite them to your loyalty offer — all sorted into lists so no one slips through the cracks.

Different businesses, same toolkit: greet, answer with quick replies, show the catalog, organize with lists, and get paid with a link.

Chapter 10 — Let AI Write Your Messages

NEVER STARE AT A BLANK SCREEN AGAIN

When you're not sure what to write, let AI draft it. Open ChatGPT, describe what you need, and paste the result into **WhatsApp** — then adjust it to sound like you and save it as a Quick Reply.

Prompts you'll use again and again:

- *Write a warm **WhatsApp** greeting message for a [your business] in [your city]. Keep it friendly and professional.*
- *Rewrite this reply to sound warmer and clearer: [paste your text].*
- *Write a friendly, pressure-free follow-up for a customer who got a quote three days ago.*
- *Write a polite payment reminder for an overdue invoice.*
- *Give me five quick replies for a [your business].*

📱 🇺🇸 **Tip — Close the loop.** When AI writes a response you love, paste it straight into **Business tools** → **Quick replies** so it's ready with a **/** shortcut forever. On your computer, you can even copy a whole chat into ChatGPT and ask it to summarize the customer's needs.

AI generates; you decide. Always give it a quick read before you send — your personality is your advantage.

Chapter 11 — Follow Up Like a Pro

STAYING IN TOUCH, WITHOUT BEING PUSHY

Most sales happen after more than one message, yet most businesses stop after the first. You don't need a complicated system — just a simple rhythm and the tools you already set up.

After you send a quote, add the customer to your **Follow-up needed** list and check in on a gentle schedule:

CHAPTER 5

The 14-day follow-up rhythm

Six gentle touchpoints, each one helpful — not pushy. Save them as Quick Replies so a follow-up takes one tap.

Keep each message helpful, not needy. Save them as Quick Replies (`/checkin` , `/tip` , `/lastcall`) so a follow-up

takes one tap. Every morning, open your **Follow-up needed** list and message everyone in it. That five-minute habit is where forgotten sales come back to life.

Closing — Your First Week

You don't have to do everything at once. Set up one thing a day, and by the end of the week **WhatsApp Business** is doing real work for you.

CHAPTER 12

Your 7-day transformation

DAY 1

Build your digital front door

DAY 2

Hire your first digital employee

DAY 3

Organize every customer

DAY 4

Build your sales system

DAY 5

Build your follow-up machine

DAY 6

Add artificial intelligence

DAY 7

Think like a CEO

**A business that runs on systems**

One improvement a day. One system a week. One better business a year.

A simple first week:

- ☐ **Day 1** — Install **WhatsApp Business** and complete your profile (Chapters 1–2).
- ☐ **Day 2** — Turn on your greeting and away messages (Chapter 3).
- ☐ **Day 3** — Create five Quick Replies (Chapter 4).

- ❑ **Day 4** — Build your catalog and get your QR code (Chapters 5–6).
- ❑ **Day 5** — Create your lists and sort every active chat into one (Chapter 7).
- ❑ **Day 6** — Set up your payment link (Chapter 8).
- ❑ **Day 7** — Add AI to your workflow and start your daily follow-up habit (Chapters 10–11).

That's it. No new software, no extra staff, no code — just the free app already in your pocket, finally working the way it should.

Keep building. Keep it simple. And let **WhatsApp Business** be your best employee.

Alejandro Soria *Founder, NKUVO Labs "Helping small businesses grow through practical AI and intelligent automation."*

Bonuses

Bonus 1 — Ready-to-Use Scripts

Copy, personalize, and send. Replace **[Business Name]** with yours.

Greeting — Hi! 🙌 Thank you for contacting [Business Name]. Tell us how we can help today, and someone from our team will reply shortly.

Away — *Thanks for your message! Our office is currently closed. Our hours are Monday–Friday, 8 AM–5 PM. We'll reply first thing when we reopen.*

Pricing — *I'd be happy to help with pricing. To recommend the right option, may I ask you a couple of quick questions first?*

Appointment — *We'd love to schedule you. What day works best — morning or afternoon?*

Quote follow-up — *Hi! I just wanted to make sure you received the estimate we sent. Happy to answer any questions.*

Payment reminder — *Just a friendly reminder that your invoice is due tomorrow. Here's your payment link: [link]. Thank you!*

Thank you — *Thank you for choosing us! We truly appreciate your business and look forward to serving you again.*

Review request — *We're so glad we could help! If you enjoyed your experience, we'd really appreciate a quick Google review — it helps other customers find us.*

Referral request — *The greatest compliment you can give us is referring a friend or family member. If someone you know could use our help, we'd love the introduction.*

Reactivation — *Hi! It's been a while since we've seen you. Just checking in to see if there's anything we can help you with.*

Bonus 2 — The Ultimate Checklist

Before spending a dollar on marketing, make sure you've completed this.

Profile

- ☐ **WhatsApp Business** installed
- ☐ Logo or professional headshot
- ☐ Complete description
- ☐ Business hours, address, email, website
- ☐ Category selected

Tools

- ☐ Greeting message on
- ☐ Away message on (outside business hours)

- ☐ At least five Quick Replies
- ☐ Catalog with your main services
- ☐ Short link and QR code saved

Organize & get paid

- ☐ Lists created
- ☐ Every active customer sorted into a list
- ☐ Payment link saved as `/pay`
- ☐ Completed chats archived

Everyday habit

- ☐ Open **Follow-up needed** every morning
- ☐ Review **Payment pending** daily
- ☐ Ask happy customers for reviews and referrals

A Final Word

You don't need to do everything in this book today. Pick one chapter, set up that one tool, and let it work for you before moving to the next. In a week, **WhatsApp Business** will be doing real work — greeting customers, answering the same questions, keeping your pipeline organized, and helping you get paid — without you lifting a finger for each one.

That's the whole idea: not a bigger team, not new software, just the free app already in your pocket, finally set up the way it should be.

Thank you for reading — now go turn it on.

Alejandro Soria

Founder, NKUVO Labs

*P.S. — If this guide helped your **WhatsApp** work harder for you, imagine what Tappt Business — NKUVO Labs' full appointment and follow-up platform built on **WhatsApp** — could do for your business next.*

End of book.
